Order from LC or SLA mi\$2.40, ph\$3.30 61-15015</p> <p>Trans. of Politekhnicheskiy Institut, Leningrad. Trudy (USSR) 1955, no. 176, p. 191-200.</p> <p>A new manometric method for measuring friction stress on a surface is analyzed. This method is based on Dean's theoretical solution for the slow motion of a viscous liquid in the vicinity of a thin projecting blade normal to a boundary surface. The measuring instrument is in the form of a blade fixed to a flat base; it is extremely simple and can be used for mak- ing measurements in the field as well as in the labora- tory. In addition to an analysis of the new methods, considerable space is devoted to the study of methods of measuring friction stress by means of surface tubes. (Author)</p>	<p>61-15015</p> <p>I.
